Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

see ABB79484), a novel carboxylesterase family member. COE-2 participates in the metabolism of various lipid and fatty acid compounds which are involved in pain and/or inflammation signalling. It is highly expressed in tissues which contain afferent neurons, particularly brain and spinal cord tissue. The invention provides CDE-2 nucleic acid molecules, antisense nucleic acid molecules, recombinant expression vectors, host cells, transgenic animals, isolated CDE-2 proteins, tusion proteins, antigenic peptides and anti-CDE-2 antibodies. CDE-2 nucleic acids are used in claimed methods of identifying subjects having, or at risk of developing, an inflammatory or pain disorder. Compounds capable of treating an inflammatory or pain disorder. Compounds capable of ability to modulate COE-2 nucleic acid expression or COE-2 polypeptide activity. Modulator compounds are used in a claimed method of treating an inflammatory or pain disorder. Carboxylesterase-associated pain disorders include hyperalgesia, pain associated with musculoskeletal disorders include hyperalgesia, pain associated with musculoskeletal disorders and pain associated with surgery, rheumatoid arthritis, somatoform disorders, fibromyalgia syndrome, etc. Carboxylesterase-associated pain disorders include viral infection, ulcerative colitis, crohn's disease, lung disorder, peritonitis, chronic observable promothitis, saccoidesis, selecoderma, uppulmonary disease, lung inflammatory appendicitis, septic shock, nephritis, amyloidosis, chronic observable promothitis, saccoidesis, selecoderma, lupus, polymyositerase-associated disorders include viral inflammatory disease, other carboxylesterase-associated disorders include unmours, cancer, aberrant blood clotting, misregulation of the sleep/wake cycle. COE-aberrant blood clotting misregulation of the sleep/wake cycle. COE-aberrant blood clotting misregulation of the sleep/wake cycle. COE-aberrant bloods and polypreptides are also useful in secrecing assacs, decection assays (e.g., chromosomal mapping, tissue typ	S Quer Sest Mato	AATTCGGCCGAGGCTCCCGCCCCAGTACTTGCTGGCGGGGATTAAATTCGGCCGGC	GATAAAAGIGIGCICACACACIGIAGACACGGCIACCAIGCCAICCACAGIGITIGCCAIC CACAGIGITGCCAICACCACCCCCCACAGGAGAGCTGGCTGGAGCATGAGGTGGATCT CACAGIGITGCCAICACTCCTGCCCACAGCAGGAGCTGGCTGGAGCATGAGGTGGATTCT GTGCTGGAGCCTCACCCCTGCTGCTGATGGCGCAAGGGGCCTTGGGTGCATTCT GTGCTGGAGCCTCACCCCTCTGCTGATGGCGCAAGGGCCTTGGGTGCCTTGCACCAA GTGCTGGAGCCTCACCCCTCTGCTGATGGCGCAAGGCCCTTGGGTGCCTTGCACCAA GTGCTGGAGCCTCACCCCTCTGCTGATGGCGCAAGCGCCTTGGGTGCCTTGCACCAA	241 GAGGCCTCAAGTGGTCACCAAATATGGAACCCTGCAAGGAAAACAGATGCATGTGGGGAA 300 241 GAGGCCTCAAGTGGTCACCAAATATGGAACCCTGCAAGGAAAACAGATGCATGTGGGAA 300 241 GAGCCCTCAAGTGTTTTTAGGAGTCCCCTTCCCAGGTATCCTCAG 360 301 GACCCCATCCAAGTCTTTTTAGGAGTCCCCTTCTCAGGTATCCTCAG 360 361 GATTGCACCTCCAGAACCCCGGAGCCCTGCAACGAACCACCCTCTCAGGTATCCTCAG 360 361 GTTTGCACCTCCAGAACCCCGGAGCCCTGGAAAGGAATCAACATCCTACCTCACC 420 361 GTTTGCACCTCCAGAACCCCCGGAGCCCTGGAAAGGAATCAAGAATCAACATCATACCC 420 421 GCCTGGGTGCCTGCAGACCCCTGGAGCCCTGGAAGGAATCAAGAGATGCTACCCCTACCC 420 421 GCCTGGGTGCCTGCAGAGCCCTGGAGCCTGGACTCTACCCCTACCC 480 481 ACGGTACCTGCAGGAGCCTTGGGGCCAGCTGGACTCTGAACGAAGGAA 480 481 ACGGTACAAGTGCTCAGGGAGACCTTGACCTGAACGTCAGCACGCGGAA 480 481 ACGGTACAAAGTGCTCAGGGAAGCAACTGTACCTCAACCTCAACCGCCGGC 540 [

The invention relates to an isolated human drug metabolising enzyme (DME)

polypeptide or a biologically active or immunogenic fragment of DME. DME

containmune/inflammatory, developmental, endocrine, eye, metabolic and

autoimmune/inflammatory, developmental, endocrine, eye, metabolic and

cautoimmune/inflammatory, developmental, endocrine, eye, metabolic and

containmanetory discress including live disorders. Autoimmune/

containmatory dispress syndrome, addison's disease, atherosclerosis,

adult respiratory distress syndrome, Addison's disease, atherosclerosis,

allergies, anaemia, asthma, autoimmune haemolytic anaemia, autoimmune

controlatis, cronn's disease, atopic dermatitis, diabetes mellitus,

conflicts, uveitis, viral, bacterial, protozoal, parasitic,

conflicts, uveitis, viral, bacterial, protozoal, parasitic,

include cancer, arteriosclerosis, cirrhosis and psoriasis, desorders

controled epilepsy and cararct; and endocrine disorders

include epilepsy and cararct; and endocrine disorders

disorders of hypothyroidism including goitre, Grave's disease,

consociated with hypothyroidism including goitre, Grave's disease,

conformatic disorders associated with gonadal steroid hormones such as

endometriosis infertility, hypergonadal disorders and gynaecomastia.

Conformation disorders associated with gonadal steroid hormones such as

endometriosis, infertility, hypergonadal disorders and gynaecomastia.

Conformation disorders such as diabetes mellitus degeneration and

metabolic disorders associated with gonadal steroid hormones such as

conformed in fervillary, hypergonadal disorders and gynaecomastia.

Conformations of the eye include conjunctivitis and macular degeneration and

metabolic disorders include diabetes, cystic fibroais, obesity and

contery, hepatitis, constitation, diarrhoea, jaundice, wilson's disease,

chromboais and hepatic tumours. DMS gene is useful in gene therapy. The

contern hemosts and page and page en is useful in gene therapy.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               137
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           146

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ò
                                                                                                                                                                         The invention relates to isolated polynucleotide (I) and polypeptide (II) sequences. (I) is useful as hybridisation probes, polymerase chain reaction (PCR) primers, oligomers, and for chromosome and gene mapping, and in recombinant production of (II). The polynuclectides are also used in diagnostics as expressed sequence tags for identifying expressed genes. (I) is useful in gene therapy techniques to restore normal activity of (II) or to treat disease states involving (II). (II) is useful for generating antibodies against it, detecting or quantitating a polypeptide in tissue, as molecular weight markers and as a food supplement. (II) and its binding partners are useful in medical imaging of sites expressing (II). (I) and (II) are useful for treating disorders involving aberrant protein expression or biological activity. The polypeptide and polymucleotide sequences have applications in diagnostics, forensics, gene mapping, identification of mutations responsible for genetic disorders or other traits to assess biodiversity and to produce other types of data and products dependent on DNA and and to produce other types of data and products dependent on DNA and and to produce other types of data and products dependent on DNA and amino acid sequences. AAS64197-AAS94564 represent novel human diagnostic codding sequences of the invention. Note: The sequence data for this pattent did not appear in the printed specification, but was obtained in electronic format directly from MIPO at (II) at the printed specification, but was obtained in the printed specification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           545
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    199
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            665
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 139
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           605
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    259
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            725
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      319

The present invention describes secreted and transmembrane polypeptides and their polymucleotides. The nucleotide sequences are useful as sources of probes, primers, for chromosome mapping, and for generation of antisense sequences. They can also be used to create transgenic animals. The proteins can be used to treat a variety of diseases and disorders, depending on their function. Diseases that may be treated include blood cogquiation disorders, cancers and cellular adhession disorders. They may also be used to raise antibodies. AAZ33891 to AAZ34338, and AAY41685 to AAY41774 represent polynucleotide and polypeptide sequence given in the exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       New secreted and transmembrane polypeptides and their polynucleotides, useful for treating blood coagulation disorders, cancers and cellular adhesion disorders.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     224 GGTGCCTTGCACACCAAGAGGCCTCAAGTGGTCACCAAATATGGAACCCTGCAAGGAAAA

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          원 상 원
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       8 8 8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    AAC78458 to AAC78599 represent polynucleotide and EST (expressed sequence tag) sequences which encode secreted or transmembrane PRO polypeptides. The PRO polynucleotides and polypeptides have cytostatic activity. The polynucleotides and polypeptides can be used for detecting the presence of PRO polypeptides in samples, for linking bioactive molecules to cells and for modilating biological activities of cells, using the polypeptides for specific targeting. The polypeptide targeting can be used to kill the target cells, e.g. for the treatment of cancers. The polypeptide pairs provide specific targeting of bioactive molecules to cells. AAC78600 to AAC78897 represent PCR primers and probes used in the isolation of the PRO polynucleotide sequences.

primers for PRO polypeptides of the invention. The sequences AAS45925-AAS46231 represent DNA molecules encoding and PCR primers for PRO polypeptides of the invention. The sequences of the invention can be used to detect the presence of a tumour in a mammal by of cells from the animal and a control sample of normal cells, whereby a higher level of expression in the test sample indicates the presence of a tumour in the mammal! Mammals include dogs, cats, cattle, horses, sheep, pigs, goats and rabbits but are preferably human. The polypeptides can be used to stimulate tumour necrosis factor (TNY) alpha release from human bloom to stimulate the proliferation or differentiation of chondrocyte cells. The PRO proteins can be used to determine the presence of tumours and also susceptibility to tumour development, particularly adernal, lung, colon, breast, prostate, rectal cervical, or liver tumours, in mammalian subjects. The oligonucleotide probes specific for the PRO nucleic acids can be used for genetic analysis of individuals with genetic disorders
                                                                                                                                                                                                                                                                                                                                                                  and
     Gurney AL;
                                                                                                                                                                                                                                                                                                                     the
                                                                                                                                                                                                                                                                                                                Novel nucleic acids encoding PRO polypeptides, used to diagnose the presence of tumors, such as prostate and breast tumors, in mammals screen for modulators of the compounds.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 5, Application US/08318826A
Patent No. 5891725
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Sakut, Haim
APPLICANT: Eckerein, Fritz
TITLE OF INVENTION: Synthetic Antisense
TITLE OF INVENTION: Oligodeoxynucleotides and Pharmaceutical Compositions
TITLE OF INVENTION: Containing Them
INTEREMENT OF SEQUENCES: 9
CORRESPONDENCE ADDRESS:
ADDRESSE: Kohn & Associates
STREET: 30500 No. 5891725thwestern Hwy., Suite 410
